

Overview

This whitepaper examines the Diocese of Brooklyn and how My Catholic Faith Delivered™ (MCFD) tailored a technology solution that uniquely met its needs. This document will examine the solutions and results. In addition, it will examine challenges that have presented themselves within the Catholic Church and a potential approach to solving them.

Challenge | Diocese of Brooklyn

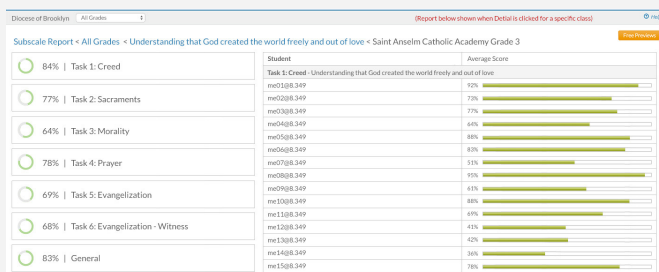

The Secretariat for Evangelization and Catechesis faced the challenge of maintaining a paper-based system of records for their Catholic Academies and Parishes. The office needed one affordable place for organizing and tracking certifications, live events, and assessment data.

Solution

The diocese partnered with Catholic Faith Technologies for a system that would be easy to use, save time and money, and reduce the number of staff and storage needed to wrangle paper records. The solution was the ability to apply for credits and customize certification tracks for all sorts of activities and events, including external resources like CDU, Step, and other concrete Catholic content.

Results

Their team of catechists grew from six thousand to seven thousand in one year.

Online and paper assessments in select grades helped to pinpoint areas needing attention.

The modern learning solution that helped prepare them for today's learner had raised confidence among catechists, and parish leaders increased.
